

## **Integrated Management System Policy**

Rangel Renewables' (RR) policy is to meet or exceed customer expectations and requirements by delivering the highest quality services available to the clean (wind) energy sector. In compliance with ISO 9001:2015 and 45001:2018, as well as our safety, environmental and regulatory requirements, RR is committed to standing behind our services before, during, and after the sale and continually improving the effectiveness of our Integrated Management System (IMS).

Rangel Renewables strives to provide proper and relevant employee training, job-specific safe work practices, personal protective equipment, operation and maintenance procedures, and safety and health guidelines that focus management and employee/contractor awareness on reducing the risk of workplace injuries and occupational health-safety incidents.

Top-level Management and Senior staff are responsible for ensuring the thoroughness of the IMS. Additionally, RR personnel, in collaboration with both our clients and vendors, have a duty to report any deficiencies and to provide suggestions and/or ideas for improvement opportunities.
